PROFESSIONAL SUMMARY

BS Data Science student focused on AI Engineering, AI agents, and Python-based automation. Hands-on experience building FastAPI services, LLM-powered applications, retrieval-augmented generation (RAG), tool-calling workflows, web-scraping pipelines, and machine-learning models. Comfortable working with Python, SQL, REST APIs, vector search, and model evaluation. Interested in building practical AI systems that reduce manual work and solve real business problems.

TECHNICAL SKILLS

AI Engineering & Agents: LLM applications, AI agents, tool/function calling, prompt engineering, REST APIs, FastAPI

RAG & Search: Embeddings, semantic search, FAISS, Sentence Transformers, document processing

Automation & Data: Python automation, web scraping, data cleaning, Pandas, NumPy, CSV pipelines

Machine Learning: Scikit-learn, model training, feature engineering, model evaluation, PyTorch, CNN basics

Databases & Tools: SQL, PostgreSQL, MySQL, SQLAlchemy, Git/GitHub, Streamlit, Joblib

Programming: Python, Java, HTML, CSS, JavaScript basics, Object-Oriented Programming, DSA

FEATURED AI ENGINEERING PROJECTS

AI Customer Support & Admin Agent

Python · FastAPI · Groq · SQLAlchemy · JWT

Building an API-based support agent with tool functions for order status, customer information, and FAQ lookup. Includes database-backed workflows, request validation, rate limiting, and admin authentication work.

CSS Daily News Automation

Python · FastAPI · PostgreSQL · Groq · GitHub Actions

Built a scheduled news-processing pipeline that collects articles from news sources, filters them for CSS-relevant topics with an LLM, and prepares concise daily briefs with categories and vocabulary support. Added a workflow for scheduled execution.

SyntoAI — RAG Document Assistant

Python · Gemini · FAISS · Sentence Transformers · Streamlit

Developed a document Q&A application for PDF, DOCX, PPTX, and TXT files using chunking, embeddings, semantic retrieval, and context-based answer generation.

RealFare — Fare Prediction API

Python · Scikit-learn · Pandas · FastAPI · Streamlit

Built a ride-fare prediction pipeline with preprocessing and feature scaling, trained a Linear Regression model, and exposed predictions through a FastAPI endpoint. Reported evaluation metrics including MAE, RMSE, and R^2.

AI-Powered E-commerce Store

AI application · Web development

E-commerce project in progress. Add the final repository link and verified feature details after the project is published.

ADDITIONAL PROJECTS

Road Damage Classification

PyTorch · CNN · RDD2022

Trained a CNN-based image classifier for road-damage categories and achieved approximately 81% validation accuracy.

Cricket Match Winner Predictor

Python · Scikit-learn · Random Forest

Built a T20 match prediction pipeline from structured match data; recorded approximately 86.9% accuracy and 0.946 ROC-AUC.

Sentiment Analysis

Python · Scikit-learn · NLP

Created a text-classification pipeline with text preprocessing, feature extraction, and model evaluation.

CSS News Automation Frontend

React · Vite · JavaScript

Built a frontend dashboard for the CSS news automation service. Live demo: css-news-automation-frontend.vercel.app

Web Scraping & CSV Processing Pipeline

Python · BeautifulSoup · Requests · Pandas

Collected semi-structured web data, cleaned datasets, handled missing values, and exported structured CSV files.

AI Tic-Tac-Toe

Python · Decision Logic

Created an interactive game with decision-making logic for a player-versus-computer experience.

Bus Reservation Database System

PHP · MySQL · HTML · CSS

Designed a database-backed reservation system covering bus schedules, seat availability, and reservations.

Java / OOP / DSA Projects

Java · OOP · Data Structures

Academic and practice projects covering object-oriented programming and core data structures and algorithms.

Personal Portfolio Website

HTML · CSS · JavaScript

Built a responsive multi-page portfolio with project cards, filtering, detail views, and contact-form validation.

Data Analysis & EDA

Python · Pandas · NumPy

Explored and cleaned datasets to identify patterns and produce analysis-ready data.

EDUCATION

GIFT University, Gujranwala — BS Data Science

Expected graduation: 2029 | CGPA: 3.83 / 4.00

CERTIFICATIONS

- Start Writing Prompts like a Pro — Google via Coursera
- Design Prompts for Everyday Work Tasks — Google via Coursera

PROFESSIONAL FOCUS

AI agents | AI automation | LLM applications | RAG systems | AI Engineering internships and entry-level opportunities
